Source Name: UNST

Year of First Use: 1954

Tributary To: SOUTH FORK JUNIPER CREEK

County: Lassen

Parcel Number:

Diversion Within: NW1/4 of SE1/4 Section 34, T37N, R08E, MB&M

A. Water is used under: Riparian claim SW 1/4 Pre 1914 right \_\_\_\_\_ Other (explain): \_\_\_\_\_

B. Year of first use (Please provide if missing above) 1954

C. Amount of Use – Enter the amount of water used each month. If monthly and annual use are not known, check the months in which water was used.

Year	Amounts below are:      Gallons      Acre-feet      Other												Total Annual
	Jan	Feb	Mar	Apr	May	June	July	Aug	Sept	Oct	Nov	Dec	
1998					X	X	X	X	X	X			
1999					X	X	X	X	X	X			
2000					X	X	X	X	X	X			

D. Purpose of Use - Specify number of acres irrigated, stock watered, persons served, etc.

Irrigation \_\_\_\_\_ acres; Stockwatering \_\_\_\_\_ ; Domestic \_\_\_\_\_ ;

Other (specify) WILDLIFE

E. Changes in Method of Diversn – Describe any changes in your project since your previous statement was filed. (New pump, enlarged diversion dam, location of diversion, etc.)

F. Please answer only those questions below which are applicable to your project.

1. Conservation of water

a. Are you now employing water conservation efforts? YES    NO ✓  
Describe any water conservation efforts you have initiated:

\_\_\_\_\_

b. If credit toward beneficial use of water under claimed pre 1914 appropriative water right for water not used due to a conservation effort is claimed under section 1011 of the Water Code, please show the amounts of water conserved:

Reductions in Diversions:

yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg)

Reductions in consumptive use:

yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg) yr \_\_\_\_\_ (af/mg)

I have data to support the above surface water use reductions due to conservation efforts. YES    NO

"The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov>.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Driver's License and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

Proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future purposes of Water Division and Use must be filed by riparian and pre 1914 appropriate water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) provides specific information concerning water rights, please contact an attorney or appropriators.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators may be granted to obtain a permit and license from the State. Appropriate rights can be granted to waters "foreign" to the natural stream system.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream a different right to the severel parent. Generally, a riparian water user must share the water supply with other riparian users. Separation of the riparian right from the severel parent never have been served from the sources of supply by an intervening parcel without the same watershed as the water source and must never have been served from the sources of supply by an intervening parcel without reversion of the riparian right to the severel parent. Generally, a riparian water user must store the water for later use or divert which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream a different right to the severel parent. Generally, a riparian water user must share the water supply with other riparian users.

There are two principal types of surface water rights in California. They are riparian and appropriate rights.

## GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the servitude parcels. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only where there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement from their diversion, and (3) assists the State to determine if additional water is available for future appropriators. (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream (1) provides a record of water use filed by a riparian and pre-1914 appropriative water users. The filing of a statement attorney or write to this office. We have several pamphlets available. They include:

"Appropriation of Water in California"

"Water Rights for Stockpond Construction Prior to 1969"

"Information Pertaining to Water Rights in California"

"Statement of Water Diversion and Use"

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A **riparian right** enables an owner of land bordering a natural lake or stream to take and use water on his riparian land later use or to divert water which originates in a different watershed, or return flows from use of groundwater. An appropriative right is required for use of water which is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State. A riparian right is exercised only when there is a surplus not needed by riparian water users. Generally, appropriative rights may be exercised to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater. Other riparian users, riparian rights may be used to divert the natural flow of a stream but may not be used to store water for parcel without reservation of the riparian right to the servient parcel. Generally, a riparian water user must share the water supply must be in the same water shed as the water source and must never have been severed from the sources of supply by an intervening parcel with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater. An appropriative right is required for use of water which originates in a different watershed, or return flows from use of groundwater. An appropriative right is required for use of water which originates in a different watershed, or return flows from use of groundwater.

Statements of Water Division and Use must be filed by a riparian and pre-1914 appropriative water users. The filing of a statement from their diversion, and (3) assists the State to determine if additional water is available for future appropriators. (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators. The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office.
